### Part 3B · Reading

Expository text (B2.2), 300–330 words, 8 questions

**8 × 2 = 16**

### Part 4 · Writing

1.1 main ideas (15) + 1.2 opinion essay, 200+ words (25)

**15 + 25 = 40**

# Starter: Think – Pair – Share

STARTER · 3 MIN

**Would you choose a career you love with a small income, or a job you don't enjoy with a big income? Why?**

### THINK · 1 min

Notebook: write 2–3 sentences. Use at least TWO spec words, e.g. career, income, make ends meet, take risks, experience.

### PAIR · 1 min

Compare with a partner. Find one idea you agree on and one you disagree on.

### SHARE · 1 min

Two pairs share with the class. Which answer gave the best reason?

# Part 1: Vocabulary – What to Expect

PART 1 · 6 MIN

## The task

- Multiple-choice gap fill
- 1 text of about 170 words
- 5 gaps · 3 options (A, B, C)
- 2 marks each = 10 marks
- Level: Towards Grade Level Goal
- Themes: Money Talks & Nail That Job!

## How to answer: 5 smart steps

1. **Skim first:** Read the whole text quickly for the main message before looking at gaps.
2. **Read around the gap:** Look at the words BEFORE and AFTER – the clue is often in the next sentence.
3. **Name the word class:** Do you need a noun, adjective or verb? (e.g. a/an/the → noun)
4. **Predict:** Think of your own word before reading A, B and C.
5. **Test & reread:** Put each option in the gap and reread the full sentence.

## Why Do We Spend So Much?

Every day, we see hundreds of advertisements. Their job is to **persuade** us to buy things we often do not need. Scientists say that shopping makes the brain release dopamine, a chemical that makes us feel happy for a short time. This is why buying something new can feel so exciting.

However, the happy feeling does not last long. Soon, we want something else. Social media has a strong **influence** on this cycle, because we see friends and celebrities with new clothes and phones every day. Some young people spend their whole **income** and are **broke** before the end of the month.

Experts give simple advice. First, wait 24 hours before buying anything expensive. Second, **put aside** a small amount of money every month. Finally, check your bank app after every **withdrawal**, so you know how much is left. People who follow these steps usually find it easier to **make ends meet**.

For generations, many **occupations** were divided by gender. Heavy **labor**, such as construction, was seen as a man's job, while nursing and teaching were considered **careers** for women. These **rigid** ideas often decided a person's future before they had any **experience** of the work.

Today, this picture is slowly changing. Women now make up a growing part of the **workforce** in engineering and aviation, and more men are choosing to become nurses. Employers increasingly value skills such as **adaptability** and **communication** rather than a candidate's gender or family **background**.

Yet progress remains uneven. In some industries, women are still paid less for the same work, and men who enter caring professions sometimes face jokes from friends. **Flexible** working hours have helped many parents, but old expectations do not disappear overnight.

Perhaps the real question is not whether a job suits a man or a woman, but whether it suits the person.

## Essential Skills for Your Future Career

Many students believe that good grades are all they need for a successful **career**. However, a recent survey of employers shows that skills are just as important as qualifications. The two skills employers mention most often are **communication** and **adaptability**.

Communication matters because almost every job involves working in a team. Employers want people who can explain ideas clearly, listen carefully and write professional emails. Adaptability is important because technology is changing quickly. Workers who are **flexible** and willing to learn new tools are more likely to keep their jobs.

**Experience** also makes a big difference. Students who complete an **internship** are more likely to be **shortlisted** for interviews, even if their **background** is not perfect. Some companies even offer a **scholarship** to interns who perform well.

For these reasons, experts argue that students should start building their skills early. Joining clubs, volunteering and doing part-time work are simple ways to prepare for the world of work.

## Essential Skills for Your Future Career

Many students believe that good grades are all they need for a successful **career**. However, a recent survey of employers shows that skills are just as important as qualifications. The two skills employers mention most often are **communication** and **adaptability**.

Communication matters because almost every job involves working in a team. Employers want people who can explain ideas clearly, listen carefully and write professional emails. Adaptability is important because technology is changing quickly. Workers who are **flexible** and willing to learn new tools are more likely to keep their jobs.

**Experience** also makes a big difference. Students who complete an **internship** are more likely to be **shortlisted** for interviews, even if their **background** is not perfect. Some companies even offer a **scholarship** to interns who perform well.

For these reasons, experts argue that students should start building their skills early. Joining clubs, volunteering and doing part-time work are simple ways to prepare for the world of work.

**Task 1.1 (notebook, 3 min):** What are the main ideas of the text? Use the frame to write 4–5 sentences in your own words.
